PROFILE

Software engineer with 5 years building software in production: consulting and systems administration for large accounts, and since 2017 the full system of a real business (website, bookings, payments and chatbot). I design backend and automation solutions that combine Python, advanced SQL and language models (agents, RAG, API integration, image and voice generation) and take them all the way to production: containers, serverless deployment on Google Cloud, secrets kept out of the code, log-based monitoring and unit cost measured. Direct point of contact for the client: requirements, estimation, follow-up and delivery.

EXPERIENCE

Systems Administrator
2026 – present

Kyndryl

- Change-request management and systems administration in business-critical environments, ensuring availability and traceability.
- Python automation of recurring operational tasks and SQL query optimisation for data exploitation.
- Incident resolution with cross-functional teams, root-cause analysis and runbooks so recurring operations are repeatable and auditable.
- Daily use of AI assistants for diagnosis, script generation and change review, shortening resolution times.

Consultant
2023 – 2026

Minsait (Indra)

- Data-model design and advanced SQL (PL/SQL) optimisation with major performance and scalability gains.
- Automated deployments and environment migrations in Python, with documented, reproducible procedures that reduced errors in production releases.
- Technical and functional administration of IBM Maximo 8 and 9: customisation, security and access, automation scripts and BIRT reports.
- Direct client contact in Scrum: requirements, estimation, follow-up and delivery with client and vendor teams.

Tech Lead & Diving Instructor
2017 – present · part-time

Costa Blanca Dive / Revolution Dive

- Full digitalisation of the business: website, online booking and payments, SEO and Google Ads campaigns optimised for cost per acquisition.
- AI customer-service and lead-qualification chatbot; group leadership and direct sales in Spanish and English.

PROJECTS

Autonomous video generation and publishing platform
Generates script, images, voice and edit with language models and publishes without manual intervention; hundreds of pieces published. Scale-to-zero serverless with cost per video measured.

Python · LLMs · Image & voice · Google Cloud · Docker · Serverless

Multi-tenant SaaS ERP for dive centres
Bookings, customers and payments with an integrated payment gateway; conversational AI assistant on WhatsApp for support and bookings.

TypeScript · Node.js · Next.js · PostgreSQL · Redsys · WhatsApp API

Customer-service and lead-qualification chatbot
Answers questions and qualifies leads, integrated with the website and booking engine; conversion tracking.

Node.js · Google Cloud · Firebase · LLMs

Multilingual websites with online booking and payments
Sites in several languages with booking engine, payment gateway and SEO; Google Ads campaigns measured by cost per acquisition.

Vue · Next.js · WordPress · Redsys · SEO · Google Ads

TECHNOLOGIES

AI & LLMs

Agents · RAG · Prompt engineering · Tool calling · Image & voice · OpenAI · Google AI

Backend & data

Python · TypeScript · Node.js · SQL / PL-SQL · PostgreSQL · REST APIs

Cloud & operations

Google Cloud · Cloud Run · Firebase · Serverless · Docker · Git · Linux

Applications

Next.js · Vue · WordPress · Redsys · SEO · Google Ads · IBM Maximo · BIRT

EDUCATION

BSc Computer Engineering
Universitat Politècnica de València · 2017–2023

Erasmus · Computer Engineering
Oulu University of Applied Sciences (Finland) · 2021–2022

Sports Technician (vocational diploma)
Complejo Preuniversitario Mas Camarena · 2017–2018

Diving Instructor
Costa Blanca Dive · since 2017

LANGUAGES

Spanish · native
Valencian · C1
English · B2

ADDITIONAL SKILLS

Diving instructor: leading groups where safety depends on quick decisions, clear communication and face-to-face sales to an international customer base.

INTERESTS

Scuba diving · Running · eSports · Travel
